Our agreements and consensus so far:

1. Context is crucial – not just the street, but the type of traffic, the adjacent land uses and other context considerations.
2. Clarity – make sure the code is orderly, using clear language and definitions.
3. Consolidation – try to incorporate the best qualities of each sign code within the framework of any new draft sign code.
4. Content Neutrality and other Legal Issues – make sure known legal issues get addressed and content neutrality is maintained throughout the code.
